

## SOLAR CONTROL FILMS / HEAT REFLECTING FILMS ANTI GLARE FILMS / PRIVACY SCREENING

### Some of the Advantages :

- Keeps out up to 80% of the sun's heat
- Glare & eyestrain reduced - more comfort for VDU users
- Improves staff comfort & efficiency.
- Reduces Air Conditioning running costs
- Increased privacy with one-way mirror films
- Improves architectural appearance
- UV filter reduce fabric UV filter reduce fabric fading.

Interior Film Code	Colour	Solar Heat Rejection
SRS220XSR	Dark Silver	79%
SRS330XRS	Medium Silver	74%
RS440XSR	Light Silver	66%
SB221XSR	Dark Bronze	75%
SB341XSR	Medium Bronze	66%
SB551XSR	Light Bronze	49%

Installing Madico Window film is a smart way to lower energy costs and reduce CO2 emissions. Our products are designed to help facility owners cost-effectively conserve energy, increase building safety, enhance occupant comfort, and reduce monthly heating and cooling costs.

**Big energy savings** Watch the numbers drop on those HVAC costs with Madico films. Madico window films can keep out up to 86% of the sun's heat, dramatically lowering air conditioning costs. In the winter, the same film helps retain interior heat, reducing heating costs. They may also help you attain LEED credits, getting your building closer to certification.

**More comfortable work environment** Madico films also help regulate the temperature disparity between the sunny and the shady areas of your building. Offices stay cooler in the summer and warmer in the winter, all of which makes your employees more comfortable.

**Reduced glare** Glare causes eye fatigue and lower productivity. Drawing curtains or closing blinds is a claustrophobic approach at best, and it drives up the bill for artificial lighting. Madico films let in the light but not the glare, helping to maintain an "open" feeling.

**Protection from fading** The fading caused by the sun's ultraviolet rays wreaks havoc on interior furnishings and merchandise, shortening their shelf life. Madico films screen almost 100% of those harmful rays, potentially saving thousands in replacement costs.

**Enhance your building's appearance** Madico films make building exteriors more attractive by eliminating visual clutter and creating a uniform appearance.
