

Somfy Connexoon Window RTS

Centrally Control & Program RTS Blinds.

Connexoon Window RTS is a box that enables you to control and program RTS connected interior blinds, curtains and lighting when connected to your internet router. You can control all connected appliances with the dedicated Connexoon Window RTS app on your Smartphone(s), even when you are not in the building.

Functions in the app:

- 4 pre-named scenarios to control several connected products simultaneously.
- Ambiances to simultaneously control several connected blinds to match requirements i.e. Leaving Building
- Timer – program up to 8 timer settings
- Automated weather data

Control multiple devices at once with scenario settings and personalise your Somfy TaHoma automation system to suit your lifestyle with smart programming features that ensure your building always works to your schedule.

Technical information

Radio Frequency	433.42 MHz 868-870 MHz (searches for an unoccupied frequency prior to transmitting)
Protection Index	IP 30
Operating temperature	+5°C to +35°C
Battery Voltage	3 V
Dimensions	145 x 145 x 50mm
Power Supply	12V Dc via 230V AC mains adaptor
Power Consumption	< 0.1 A Idle 0.8 A Maximum
USB Interface	5V DC 500mA max

Functions

Number of days	20
Number io devices connected	100
Number of RTS devices	50
Number of controllers connected	20
Number of cameras connected	5
Summer / Winter clock change	Automatic
