BLACKOUT

& MERIDIAN[™]

Meridian is a tough, high-performance blackout fabric.

A basketweave screen fabric in a range of neutral colours, with a white backing that provides total light blockage. This is a good-looking fabric, but it is not only what you can see that makes it special.

The host of features packed into Meridian include Greenguard certification and Microban[®] antimicrobial protection. It is also halogen free and flame retardant. The reflective backing makes it energy efficient too.
